EDUCATION

Indian Institute of Information Technology, Surat

B.Tech in Computer Science and Engineering

August 2024 – Present

CGPA: 9.04/10

St. Joseph's Convent, Jabalpur

Class XII - C.B.S.E

April 2024

Percentage: 88%

St. Joseph's Convent, Jabalpur

Class X - C.B.S.E

April 2022

Percentage: 89%

RELEVANT COURSEWORK

- Data Structures & Algorithms
- Computer Architecture & Organization
- Database Management Systems
- Operating Systems
- Computer Networks
- Object Oriented Programming

PROJECTS

GitHub Repository RAG Assistant — *Python, Streamlit, FAISS, Sentence Transformers, GitPython, Pytest* [Source Code](#)

- Building an AI-powered codebase analysis tool that allows users to input a GitHub repository URL and ask natural-language questions about the code.
- Developed a modular RAG pipeline for repository cloning, file filtering, code parsing, chunking, embedding generation, and FAISS-based vector search.
- Implemented source-traceable retrieval by preserving file paths, programming language, chunk indexes, and line numbers for each code chunk.
- Built a basic Streamlit frontend with light/dark mode to process repositories, inspect parsed files, view chunks, and create vector indexes.

Mood Buddy – AI Emotional Wellness Platform — *React, Node.js, Express, Gemini API*

[Source Code](#)

- Developed an AI-powered emotional wellness platform that generates personalized conversations based on users' emotional state.
- Engineered a responsive React interface with webcam integration and real-time multi-turn chat.
- Implemented a secure Express backend to manage conversation context and AI requests.
- Integrated the Gemini API using structured prompt engineering for context-aware and safe AI responses.

Codeforces+ – Competitive Programming Analytics Platform — *React, Vite, Tailwind CSS, REST APIs* [Source Code](#)

- Developed a competitive programming analytics platform using the Codeforces REST API to visualize user performance and contest statistics.
- Implemented rating history graphs, solved-problem analysis, and contest insights through dynamic data visualization.
- Designed reusable API service modules and modular React components for scalable feature development.
- Optimized API data fetching and built a responsive interface using React, Vite, and Tailwind CSS.

TECHNICAL SKILLS

Programming Languages: C++, C, Python, JavaScript, SQL

Frameworks & Libraries: React.js, Node.js, Express.js, Tailwind CSS, React Router, Redux Toolkit, Streamlit, Sentence Transformers

Databases & Vector Stores: MongoDB, MySQL, Appwrite, FAISS

Developer Tools: Git, GitHub, GitPython, VS Code, Postman REST APIs, PyTest

Programming Paradigms: Object-Oriented Programming

ACHIEVEMENTS

- Secured **2nd place** in **Reimagination**, a software development hackathon organized by GDG at IIIT Surat.
- Secured **2nd place** in **Speed Coding**, a team-based competitive programming contest organized by LCS (Learn Code Solve) at IIIT Surat.
- Solved **200+** DSA problems on LeetCode covering arrays, trees, graphs, dynamic programming, and greedy algorithms.
